

LEOPARD TEMPLATE GUIDE

STEP 1

Place a piece of card or stiff paper larger than the main triangle of the bike behind the frame and mark the inside outline of the tubes.

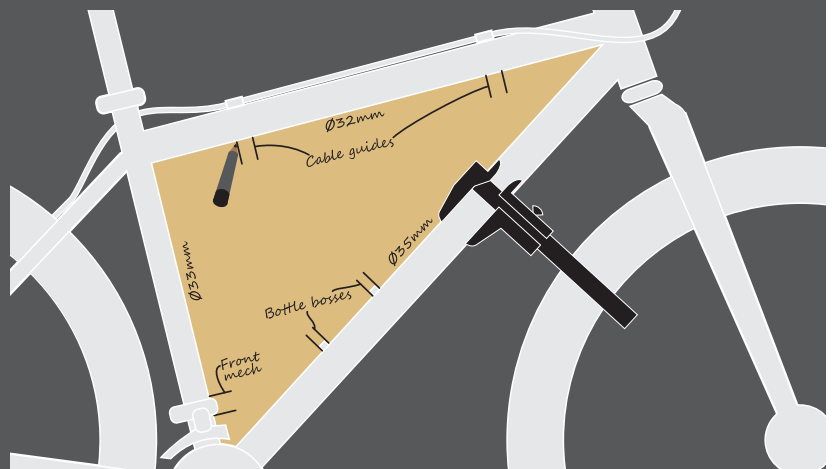

STEP 2

Cut away the excess card, keeping to the outside of your line.

STEP 3

Reinsert the template into the frame and trim off any excess to ensure an exact fit.

STEP 4

Measure and note the tube diameters.

Mark the position of any frame features that would influence strap positions, etc. e.g. cable guides, front mech band, bottle bosses.

If ordering a partial frame bag (Clouded Leopard), please also mark the outlines of bottles, suspension or any other parts you want the bag to fit around.

STEP 5

Write your details and your frame details on the template and post it to us (it's ok to fold it) at Wildcat Gear, 10 Priory Hill, Brecon, LD3 9DH
